Authorship

All authors (maximum 4) must have made an individual contribution to the writing of the article and not just been involved with the patient's care. Individuals just involved in the patient's care (including diagnosis and management) should be listed in the acknowledgements.

The uniform requirements for manuscripts submitted to medical journals state that authorship credit should be based only on a substantial contribution to the following:

- Conception and design, acquisition of data or analysis and interpretation of data
 - Drafting the article or revising it critically for important intellectual content.
 - Final approval of the version published.
 - Agreement to be accountable for the article and to ensure that all questions regarding the accuracy or integrity of the article are investigated and resolved.
4. Submission by email, doc or pdf file format (psrm.research@gmail.com)
